CAREER OBJECTIVE

Aspiring AI-enabled full-stack developer seeking to build intelligent, scalable web applications by combining modern frontend technologies with robust backend systems and applied AI/ML solutions. Eager to contribute to innovative products, enhance user experiences through data-driven insights, and continuously grow in a dynamic development environment.

EDUCATION

SRI MANAKULA VINAYAGAR ENGINEERING COLLEGE ***2022 - 2026***

B.Tech in Electronics and Communication Engineering
CGPA – 7.87

AKLAVYA INTERNATIONAL SCHOOL

HSC | ISC Board of Education | Computer Science | ***2021 - 2022***
Percentage - 85.25%

SSLC | ICSE Board of Education | ***2019 - 2020***
Percentage – 89.25%

SKILLS & ABILITIES

Language – Java, C, Python, Verilog, Matlab

Web UI – HTML, CSS, Javascript, React

Databases - SQL

Framework & Tools – Maven, Spring, Springboot, REST APIs

Cloud - Git, GitHub, Docker

Soft Skills – Communication, Teamwork, Time Management, Adaptability

PROJECTS

- **ITSM DeskPro, IT Service Management Portal –**
  Developed a scalable enterprise IT Service Management platform using Java Spring Boot, React, and MySQL. Implemented secure REST APIs with JWT authentication, Spring Security, Hibernate, and role-based access control, featuring incident tracking, service requests, change management, asset management, and analytics dashboards.
- **Employee Management System using JAVA –**
  Developed a desktop-based application in Java to manage employee records, including adding, updating, deleting, and viewing details using Java and SQL CRUD operations.
- **HireSense AI, Resume Screening Website –**
  Developed an intelligent recruitment platform that uses NLP and AI to parse, evaluate, and rank resumes based on job requirements. Implemented features like resume parsing, keyword matching, AI-based scoring, and a dashboard for instant candidate shortlisting with customizable filters.

EXPERIENCE

PROGRAMMER ANALYST TRAINEE - COGNIZANT

Coimbatore, India

April 2026 – August 2026

- Developed enterprise-grade full-stack applications using Java 17, Spring Boot, React.js, Tailwind CSS, and MySQL as part of Java Full Stack Engineering training
- Designed and implemented secure REST APIs with Spring Data JPA, Hibernate, Spring Security, JWT authentication, and role-based access control (RBAC) following layered architecture and best practices.
- Gaining exposure to enterprise development practices, version control (GIT), Maven, Docker, and collaborative Agile development workflows.

INTERNSHIPS

· **Henly Tech -** Undertook a 2-week internship in Machine Learning during March to April 2025, where I learned the basics of model building, data preprocessing, and algorithm implementation.

· **AICTE Eduskill -** Successfully completed a 10-week Data Engineering Virtual Internship from January to March 2025.

· **Sense Semiconductors and IT Solutions Pvt. Ltd -** Completed a 40-day Internship in Front-End UI Development using ReactJS and Figma, focusing on creating responsive and interactive web interfaces.

CERTIFICATIONS

· Java Programming Course | **SkillRack**

· C Programming Course | **SkillRack**

· Introduction to Internet of Things | **NPTEL** | Jul – Oct 2024 | Elite – 83%

· Sensors and Actuator | **NPTEL** | Jan – Apr 2024 | Elite – 75%

· MATLAB Onramp, Image Processing, Signal Processing, Machine Learning and Deep learning

· Junior Grade Typewriting English **(First class with Distinction)**

ACHIEVEMENTS

· LineXplore | Bot Follower - 1st Prize | Takshashila University | 30 Apr 2025

· JIGSAYA | Robo Race and Soccer - 1st Prize | Pondicherry Technological University | 10 Apr 2025

· XION 2025 | Robo Soccer and Soccer - 1st Prize | SRM Vadapalani | 25 Mar 2025

· Mitilence 2025 | Bot Follower - 2nd Prize | Manakula Vinayagar Institute of Technology | 14 Mar 2025

HACKATHON PARTICIPATIONS

· **Smart India Hackathon (SIH) 2024 – National Level, Government of India**

Built a railway track inspection cart using acoustic sensors and an ML model to detect cracks, processing real-time sound data to identify anomalies. Implemented location tagging and a live web dashboard for continuous monitoring and alerts.

· **0x Hack $day National Hackathon - National Level**

Developed the React frontend for a real-time AI story generation platform with features like image upload, TTS controls, and multimodal inputs. Collaborated on Flask REST API and Groq (LLaMA) integration, contributing to full-stack design and delivering an end-to-end AI application within a hackathon.
